

LBC 1256/00 EVAC Connection Adapter

The LBC 1256/00 is a EVAC connection adapter, intended to be installed in series with the 100 V primary connection of the loudspeaker unit, in order to change the loudspeaker into an BS 5839 part 8 compliant unit. This additional connection adapter ensures that, in the event of a fire, damage to the loudspeaker does not result in failure of the circuit to which it is connected. In this way, system integrity is maintained. The connection adapter consists of a 3-pole ceramic screw terminal block with a pre-mounted thermal fuse, which can be screwed in place of a present connection terminal or screwed or fixed in a standard connection box. The LBC 1256/00 consists of 100 pieces.

Technical Specifications

Mechanical

Pack Contents	100 Pieces
Type	3-pole screw connector
Material	Ceramic
Thermal Fuse	150°C
Approx. Dimensions	19 x 37 x 22 mm (0.75 x 1.46 x 0.87 in)
