

COPPERLINE[®]

The ComNet™ CopperLine® CLFE4US1TPC is an unmanaged switch that combines four individual Ethernet data channels over a single standard COAX or UTP cable. Symmetric bandwidth assures full bandwidth transmission is maintained over the entire operational distance for both uploads and downloads with virtually zero packet loss. Bandwidth assurance provides the ability to transmit multiple cameras on single camera runs with no information loss. Combined with the CopperLine CLFE(X)COAX series or CLFE(X)UTP series multi-port extenders up to 64 cameras can be transmitted to a central location on just 16 cables. It also can be powered by PoE eliminating the need for remote site extra cost power supplies. Certified for use with high-bandwidth megapixel or HD IP cameras, the CLFE4US1TPC is tested to network packet performance standards along with major manufacturer compatibility testing. The CopperLine CLFE4US1TPC assures you of error free, quality operation.

FEATURES

- › 4-port unmanaged switch combines four individual Ethernet data channels over a single standard COAX or UTP cable.
- › Extends Ethernet distances: up to 5,000 feet (1524 m) over coax; or up to 3000 feet (914 m) over standard UTP1.
- › High Density: High (4) channel count within a very small package; ideal for those installations where equipment cabinet space is limited
- › Can be powered using 12 Volts DC, 24 Volts AC or PoE af/at power sources.
- › High data rate, ideal for the high bandwidth requirements of Mega-pixel and HD cameras, multiple IP cameras systems, and cameras requiring jumbo frame transmission
- › Symmetric bandwidth provides consistent upload and download with virtually zero packet loss over the total usable distance
- › Type tested to RFC-2544 TCP/IP network bandwidth packet transmission standards
- › LED Indicators confirm connectivity
- › User-selectable data rate for maximum bandwidth and transmission distance utilization
- › Complies with all major IEEE standards and RFC network protocols for UDP, TCP/IP, HTTP/HTTPS
- › Fixed managed L2 functions include 802.1p QoS, support of 2k MAC addressing, learning and aging and a non-blocking switch fabric.
- › Designed for use in harsh operating environments: extended temperature operation from -40°C to +75°C and fully compliant with the environmental requirements of NEMA TS-1/TS-2 and the Caltrans Specification for Traffic Signal Control Equipment
- › Rugged extruded aluminum housing: May be wall or standalone mounted.
- › Designed and manufactured in the U.S.A.
- › Lifetime Warranty

APPLICATIONS

- › Retrofit existing analog CCTV installations to Ethernet-based systems
- › CCTV systems for warehouses, casinos, airports, school campuses

SPECIFICATIONS

Electrical

Ethernet Interface	10/100BaseT
Ethernet Data Rate	DIP-switch selectable 10/100Mbps Full data rate / full duplex up to the maximum rated distance
Transmission distance	Coax ¹ 75Ω: 5,000 feet (1524 m) at 10BaseT, or 1,800 feet (548 m) at 100BaseT; UTP ¹ Cable: 3,000 feet (914 m) at 10BaseT, or 2,100 feet (640 m) at 100BaseT Using 50V PSE power source and external power supplies for extenders
Operating Power	12 VDC, 24 VAC or POE @ 250 mA, max.
LEDs:	- Operating Power - Ethernet: Traffic - Link Extended Ethernet Traffic
Connectors Ethernet:	4 × RJ-45 Coaxial Cable: Female BNC. UTP/Twisted Copper Pair: RJ-45 Operating Power: Terminal Block
RFC	2544 TCP/IP Packet Transmission
Standards Compatibility	IEEE 802.3af PoE, IEEE 802.3at PoE, RFC 768 UDP, 2068 HTTP, 793 TCP 791 IP, 1783 TFTP, 894 IP over Ethernet
Jumbo Frame	Supported

Mechanical

Size (H x W x L)	1.2 × 5.125 × 4.54 in (3 × 13 × 11.5 cm)
Weight	0.7lbs (0.32kg)
Case Material	Aluminum

Environmental

Operating Temp	-40° C to +75° C
Storage Temp	-40° C to +80° C
Relative Humidity	0% to 95% (non-condensing)

[1] Distance figures are obtained using in-house testing mirroring installations. Factors such as coaxial cable quality, the number of connectors in the cable run, the use of PoE, and environmental conditions encountered within the installation may affect the actual transmission distance, and should be taken into consideration. UTP distance is based on 4-pair Cat5 cable. Using 1-pair cable will limit distance.

DIMENSIONAL DRAWING

ORDERING INFORMATION

Part Number	Description	Maximum Distance without PoE ²	Maximum Distance with PoE ²
CNFE1M1A/2	10/100 Mbps Ethernet 1310/1550nm	10 dB	3 km (2 miles)
Options	9 Volt DC Plug-in Power Supply, 90-264 VAC, 50/60 Hz Add suffix 'C' for Conformally Coated Circuit Boards (Extra charge, consult factory) Mounting Hardware (not included)		

[2] Distance figures are based on RG-59U coaxial cable and a 50V PSE PoE power source, and external power supplies for the extenders.

Tested and certified by an independent laboratory for full compliance with the environmental requirements (ambient operating temperature, mechanical shock, vibration, humidity with condensation, high-line/low-line voltage conditions, and transient voltage protection) of NEMA TS-1/TS-2 and the Caltrans Specification for Traffic Signal Control Equipment.

TYPICAL APPLICATION

Low Power Consumption
