IR3 Flame Detector

www.boschsecurity.com

Flame detectors are used to detect open flames indoor and outdoor. They respond to the light emitted from flames during combustion.

Flame detectors are especially suitable for smokeless liquid and gas fires not visible for the naked eye as well as for fires of materials that contain carbon with strong smoke emission.

Typical areas of application are large industrial warehouses, airplane hangars, chemical facilities, oil refineries, machine rooms, ferries and freight ships, power plants, printing plants, wood warehouses, subway tunnels.

Functions

Most IR flame sensors respond to $4.3 \,\mu\text{m}$ light, emitted by hydrocarbon flames. By responding to 0.75 to 2.7 μ m light emissions from fires almost all flickering flames can be detected.

The flame detector has three IR sensors. The detector discriminates between flames and other light sources by responding only to particular optical wavelengths and flame flicker frequencies. False alarms due to factors as flickering sunlight are avoided by a combination of filters and signal processing

- Class 1 sensitivity according to EN 54-10 detects 0.1m² flames at 25m
- Low risk of false alarms due to different IR wavelengths and a combination of filters and signal processing techniques
- Reliable operation, even if the lens is contaminated by a layer of oil, dust, water-vapour, or ice
- Selectable response time
- 2-wire or 4-wire configuration via DIP switch settings

techniques. Low-frequency detection enables the sensor to operate through a layer of oil, dust, water vapour, or ice.

An alarm is indicated via increasing supply current consumption (2-wire) or via relay contact (4-wire). The alarm current also illuminates the red LED of the detector.

Certifications and approvals

Region	Certification	
Europe	CPD	016589 IR3 Flame Detector
Germany	VdS	G 212189 IR3FlameDetector

Installation/configuration notes

- The device complies with EN 54-10.
- Applications and locations to avoid:
 - ambient temperatures above +55 °C
 - close proximity to radio frequency sources
 - exposure to severe rain and ice
 - large amounts of flickering reflections
 - large IR sources for instance heaters, burners, flares
 - obstructions to field of view
 - sunlight falling directly on the detector optics

- spot lighting directly on the detector optics
- Latching mode is recommended (factory setting). Different alarm signalling modes can be set via DIP switches: increasing supply current consumption (for 2-wire configuration) or relay contact (for 4-wire configuration).
- The device can be connected using an FLM-420/4-CON Conventional Interface Module to the Local Security Network LSN. The device can also be used in conjunction with a CZM 0004 A module. For connecting more than one IR3 Flame Detector use a four-wire end of line element. Extended line monitoring is necessary for EN 54-13 compliant operation.
- The device cannot be used with an FPC-500 Conventional Fire Panel.

Parts included

1 IR3 Flame Detector, Blue

Technical specifications

Dimensions

Detector (W x H x D)	108 x 142 x 82 mm
Cable gland entries	2 x 20 mm

Electrics

Terminal functions	
1 – 2	Supply in connections +IN and -IN
3 - 4	Remote test input connections +R and -R $% \left({{\mathbf{R}}_{\mathbf{r}}} \right)$
5 - 6	Fire Relay RL1 connections
7 – 8	Fault Relay RL2 connections
Operating voltage	14 to 30 V DC
Current consumption, 2-Wire configuration	
Standby	4 mA
Alarm	20 mA
Current consumption, 4-Wire configuration	
Standby	8 mA
Alarm	20 mA

Mechanics

Housing material	Die Cast Zinc Alloy (ZA12)
Housing color	Blue
Weight	2 kg
Protection category (EN 60529)	IP65

Environmental conditions

-10 to +55°C		
-20 to +65°C		
95%, no condensation		
Special features		
Detection of low frequency (1 to 15 Hz) flickering infrared radiation		
0.75 to 2.7 μm		
90° cone		
High (Class 1) and Low (Class 3)		
Class 1: 0.1 m ² n-heptane at 25m Class 3: 0.1 m ² n-heptane at 12m		

Ordering information

IR3 Flame Detector

016589 IR3 Detector for open flames, for indoor and outdoor areas, Blue Order number **016589**

Accessories

Stainless Steel Adjustable Mounting bracket Order number 007127

Portable Flame Detector Test Unit Order number 016091
